
Information Institute Conferences

Las Vegas | Nevada

March 29 - 31, 2016

The Information Institute is an academe-industry consortium founded to further understanding of intricate relationships between information science and technology. The Information Institute's mission is to encourage association among individuals who have an interest in the study of information. The mission is realized by providing educational opportunities for members and promoting scholarly and practitioner work in information studies.

The Information Institute is a non-profit, non partisan information policy research and educational organization incorporated in USA . It is organized as a charitable, educational and scientific concern under section 501(c)(3) of the United States Internal Revenue Code of 1986. Under section 501(c)(3), Information Institute is a tax exempt organization. As per the code the Information Institute is permitted to undertake education and research activities in the field of information science and technology. Such activities may include, but are not limited to, organizing conferences, furnishing scholarships to doctoral students, awarding research grants and publishing scholarly books and journals.

Welcome

The year was 2002, and we were still recovering from the aftermath of 9/11. Gordon Hunter, who at that time was a Professor at Lethbridge University in Canada, initiated a dialogue with SAP to create an academia-industry alliance. This gave birth to the Information Institute. SAP, University of Nevada Las Vegas, University of Detroit Mercy and a handful of other organizations joined hands to create formally a non-profit entity - The Information Institute. It was later organized as a 501(c)3 entity and gained a tax-exempt status. Over the years, the Institute got involved with several conferences and workshops. The ISOneWorld, Annual Security Conference, Conference on Information Science & Technology, all ended up becoming stand-alone activities of the Institute. The Institute then began publishing academic journals - the Journal of Information Science & Technology and the Journal of Information System Security took shape.

All in all, it has been an amazing decade for the Information Institute. And we are just coming of age. In 2012, the Information Institute entered into a strategic relationship with the Universidade de Lisboa, Portugal to offer an International DBA/Ph.D. program in a hybrid format. The Institute has also launched a Cyber Security Certification program. Many more activities are planned. Please stay tuned for the latest.

I hope you enjoy the beautiful surroundings of Las Vegas. The city has so much to offer - within a 30-minute drive you are in the midst of the desert, hills, and the water systems. And Las Vegas in itself never sleeps. I hope you enjoy the conference and as they say it here - Viva Las Vegas!

Gurpreet Dhillon, PhD
President, The Information Institute
Virginia Commonwealth University, USA

**Annual Security Conference / Annual Ethics Conference
 Information Institute Las Vegas Conferences
 Schedule :: March 29-31, 2016**

Tuesday
